

## Mounted Hydraulic Operated Crane Boat, Pier or Combined Boat and Pier -Experienced/Refresher/Conversion (1 day)

### Course Details

- Title: Mounted Hydraulic Operated Crane Boat, Pier or Combined Boat and Pier - Experienced/Refresher/Conversion (1 day)
- Product Code: CLVC01X
- Type: Training Course
- Duration: 1 Days

The regulations governing the use of lifting appliances and lifting equipment are extensive and cover all aspects of loader operations.

Any lifting operation can be very hazardous unless the correct equipment and working practices are employed, the responsibility for this can rest with the mounted hydraulic operator. By applying knowledge and understanding correctly working within the regulations operators can guarantee safe and successful operations.

### Who is it for?

This training is ideal for anyone who uses or will be using a MHOC (a boat crane, pier crane or combined boat and pier crane) with an attachment, for example a hook, clamshell bucket, grab, auger, hydraulic clamp or roller.

### What will you get from it?

When you've taken this training, you will:

- Know a range of tasks for which the loader/crane is capable.
- Understand the legislation and safety requirements necessary for the use of the loader and loading system.
- Understand the purpose of the machine components, their functions and controls.
- Explain the safe working load, its attachments and any ancillary equipment used.
- Demonstrate correct work planning for loading operations including ability to recognise conditions that limit the loading procedure and use of assistant.
- Carry out routine pre-use inspection of the loader and the base machine including the lifting accessories and equipment.
- Carry out routine operator maintenance procedures for the machine to prescribed standards.
- Demonstrate effective operation of the crane controls.

- Set the loader crane in transport/park position (and manoeuvre the machine if appropriate).
- Load and unload products within safe working parameters.
- Stack produce to a prescribed standard.
- Secure the load for transport.
- Inspect the machine after use and prepare for transport or storage.

## Course sessions:

Sessions for this training include:

- Health and safety
- PUWER and LOLER
- Components used in lifting operations
- Attachments and accessories
- Safe working load
- Risk management
- The landing area
- The lifting plan
- Signalling
- Pre-use checks
- Loading a boat or barge
- MHOC use with tipping body vehicles and trailers
- Electricity
- Permit to work
- Lifting accessories.

## The things you need to know:

<b>Duration:</b>	1 Days
Notional Level:	2
Delivery method:	Classroom/Practical
<b>Max no of learners:</b>	4
