

Mounted Hydraulic Operated Crane Lorry Loader -Semi-experienced (2 days)

Course Details

- Title: Mounted Hydraulic Operated Crane Lorry Loader -Semi-experienced (2 days)
- Product Code: MHOC02X
- Type: Training Course
- Duration: 2 Days

Any job where lifting is involved can be very dangerous. Which is why proper training is essential. This 2 day course for those with some experience already will cover everything you need to know in order to carry out your work safely and confidently.

There are extensive regulations governing the use of lifting appliances and equipment. These regulations cover all aspects of loader operations and so are vital in your work. This course will give you the knowledge you need to help avoid accidents at work.

Who is it for?

This training is ideal for anyone who uses or will be using a lorry loader (MHOC- mounted hydraulic operated crane) with an attachment, for example a grab, hook, clamshell bucket, hydraulic clamp, auger.

What will you get from it?

When you've taken this training, you will:

- Know a range of tasks for which the loader/crane is capable.
- Understand the legislation and safety requirements necessary for the use of the loader and loading system.
- Understand the purpose of the machine components, their functions and controls.
- Explain the safe working load for the MHOC, its attachments and any ancillary equipment used.
- Demonstrate correct work planning for loading operations including ability to recognise conditions that limit the loading procedure and use of assistant.
- Carry out routine pre-use inspection of the loader and the base machine including the lifting accessories and equipment.
- Carry out routine operator maintenance procedures for the machine to prescribed standards.
- Demonstrate effective operation of the crane controls.

- Set the loader crane in transport/park position (and manoeuvre the machine if appropriate).
- Load and unload products within safe working parameters.
- Stack produce to a prescribed standard.
- Secure the load for transport.
- Inspect the machine after use and prepare for transport or storage.

Course sessions:

Sessions for this training include:
